RE: Colonial Pipeline Company Incidents

Dear Freedom of Information Officer:

Under the Freedom of Information Act, 5 U.S.C. § 552, I am requesting a copy of all public records relating to the Colonial Pipeline Company. This request includes all documents and information of whatever nature, kind or description, including but not limited to all correspondence, records of investigations, statements, photographs, reports, findings, notification requests for corrections, responses from Colonial Pipeline, requests for information, litigation, enforcement actions, executive orders, enforcement cases and settlements, consent decrees, orders, criminal enforcements, data, civil enforcements, civil administrative actions, notices of violations, civil judicial actions, criminal actions, civil penalties, injunctive relief, CAs, FOs, AOCs, settlements, orders and any penalties assessed against Colonial Pipeline for all times. Specifically, but without limitation, include all such information regarding the gas leak in Shelby County, Alabama in September 2016 and the explosion in Shelby County, Alabama on October 31, 2016.

If you deny any or all of this request, please cite each specific exemption you feel justifies the refusal to release the information, please identify the materials or types of materials withheld and notify me of the appeal procedures available to me under the law.

Please contact me to advise when I might expect copies of the requested documents; and, let me know of any fees you must charge. If the charges are expected to be large, please contact me first. Thank you for your time and attention to this matter.

Sincerely,

Glenda G. Cochran
